

HEALTH AND SAFETY POLICY

Cortona Resources is an independent Australian resource company focused on the exploration and development of precious metals projects. We believe that all injuries and work related diseases are preventable, and will strive to continually improve our safety and health performance such that our employees, contractors and visitors are not exposed to hazards in the workplace.

To accomplish this, Cortona Resources will:

- Train and educate employees, contractors, and visitors to a standard where they are capable of meeting their individual health and safety responsibilities, and those of the company.
- Promote the concept that health and safety management is a shared responsibility between the employer and employee.
- Promote best practice health and safety management practices throughout all of its activities, including the improvement of the health and well being of its workforce.
- Ensure compliance with all health and safety laws, regulations and other requirements as the minimum standard for its management practices.
- Establish systems of work, standards and procedures to minimise exposures to hazards.
- Identify, assess and control workplace risks to minimise exposure to employees, contractors and visitors.
- Establish annual health and safety objectives and targets designed to meet continual improvement goals for each operation.
- Regularly test its ability to respond effectively to all types of health and safety emergencies.
- Implement an audit and monitoring program to measure its health and safety performance, and where necessary make improvements to its practices and performance.
